Koteshwor, Kathmandu

SKILLS

- Languages: **C#**, JavaScript, CSS
 - Databases: PostgreSQL, DynamoDB
 - Frameworks/Libraries: .NET, React, Redux, RabbitMQ, Redis
 - Tools/Platforms: Git, Postman, Nginx, npm, Docker, GitHub Actions, SonarQube, AWS Lambda
-

PROFESSIONAL EXPERIENCE

Fintech Solutions

Intern (3 months) - Jr. Software Engineer

June 2024 - Present

- Developed and maintained scalable RESTful APIs using ASP.NET Core, applying clean architecture, CQRS, and Domain-Driven Design (DDD) principles to ensure separation of concerns and high maintainability.
 - Successfully integrated payout systems for RemitX Nepal (IRR) and Egypt Payout (Balad), ensuring seamless international transaction processing.
 - Integrated fallback handling, dynamic mapping, and input sanitization to enhance system robustness and prevent runtime errors.
 - Designed and implemented PostgreSQL schemas to support complex financial transaction workflows.
 - Developed and optimized SQL queries, stored procedure and functions for secure, efficient, and scalable data access.
 - Utilized both ORM and raw SQL to balance development speed with performance-critical operations.
 - Support/modify the existing web services as per user requirements.
 - Worked on serverless middleware projects for payout integrations, successfully delivering projects on time with positive outcomes
-

CERTIFICATIONS & TRAINING

Aloi Global

.Net Bootcamp

Feb 2024- April 2024

- Developed robust and scalable web applications using ASP.NET Core, focusing on RESTful API development and adhering to industry best practices.
 - Led the development of API functionalities, including HTTP methods, validation, and efficient data retrieval and manipulation techniques.
 - Orchestrated seamless deployment and cloud integration strategies, utilizing the Azure & AWS platform for efficient application hosting and configuration.
-

EDUCATION

Bachelor of Engineering in Computer Engineering

- Nepal College of Information Technology [NCIT] - Batch [2018]
