PROFESSIONAL SUMMARY

.NET Developer with hands-on experience building scalable RESTful APIs and backend services for fintech payout and remittance systems. Skilled in ASP.NET Core, Clean Architecture, CQRS, and PostgreSQL, with practical exposure to AWS serverless infrastructure (Lambda, SQS, SNS), CI/CD, and secure authentication/authorization. Comfortable working across the full SDLC in Agile/Scrum teams.

SKILLS

Programming Languages: C#, JavaScript, SQL | **Backend Frameworks:** ASP.NET Core, Entity Framework Core |

Databases: PostgreSQL, DynamoDB

Architecture & Design Patterns: Clean Architecture, CQRS, RESTful APIs, DDD | **Cloud & DevOps:** AWS (Lambda, SQS, SNS, API Gateway), Docker, GitHub Actions, CI/CD

Tools & Platforms: Git, Postman, Nginx, SonarQube, CSS, RabbitMQ, Redis

PROFESSIONAL EXPERIENCE

.NET Developer — [Fintech Solutions](#)

Apr 2024 – Present

- Contributed across the full SDLC — requirements analysis, system design, development, testing, deployment, and production support — as part of an Agile/Scrum team.
- Designed and developed scalable RESTful APIs using ASP.NET Core, implementing validation, pagination, and standardized HTTP responses.
- Applied Clean Architecture with clear separation of concerns across Controller, Application, Domain, and Infrastructure layers; used CQRS and foundational DDD principles to structure business logic.
- Developed backend services for international payout and remittance workflows, implementing idempotency, retry/fallback logic, and webhook/API Gateway callbacks.
- Designed and optimized PostgreSQL schemas, indexes, and stored procedures; wrote performance-tuned SQL queries using both Entity Framework Core and raw SQL.
- Built event-driven, asynchronous components using AWS Lambda and SQS/SNS, and background workers for high-volume processing.
- Implemented secure authentication and authorization (RBAC, encryption, audit logging), centralized exception handling, custom middleware, and structured logging to improve system reliability.
- Practiced CI/CD workflows using GitHub Actions and Docker; performed unit and integration testing, resolved defects, and supported production issue resolution through code reviews.

Intern, .NET Developer — [Aloi Global](#)

Feb 2024 – Mar 2024

- Developed and tested RESTful APIs using ASP.NET Core, applying industry-standard HTTP methods, request validation, and data retrieval/manipulation techniques.
- Supported deployment and cloud integration on Azure and AWS, assisting with application hosting and environment configuration.
- Built a practical foundation in clean coding practices and API design ahead of transitioning into a full engineering role.

EDUCATION

Bachelor of Engineering in Computer Engineering

Nepal College of Information Technology (NCIT) — Batch 2018
